Panattoni Europe has delivered a factory at Panattoni Park Białystok for Pilkington IGP. The manufacturing plant offers 10,000 sqm and will be used for making glass units and metal racks. The investment is the second joint project between Pilkington IGP and Panattoni Europe. "Białystok is the most dynamically growing city in Podlasie, so building a modern manufacturing plant here is a great opportunity for us, with prospects of dynamic growth and reinforcing our position in the region," said Krzysztof Granicki, president of the board at Pilkington IGP.
